Dr. Moore,

Your students are set up with accounts and should be good to go!

To sign in, they'll need to go to: <https://courses.purduenext.purdue.edu/>

Once they are there, they will sign in with their Purdue NExT Account. They will be able to sign in with either their e-mail address that was provided to us or their username. The username is the name in the e-mail address before the @miners.utep.edu. For example, if their e-mail address was [demoaccount@miners.utep.edu](mailto:demoaccount@miners.utep.edu), their username would be demoaccount.

The password for each user is purduenext2015. When they log in for the first time, they will be prompted to change their password.

I've added your bio as well as the local course information (a link to your site) under "pages."

If you have any questions please feel free to let me know!

Thanks!

---

Billy White
